

May 2022 CARE Team Newsletter

Common Concerns

These are common concerns that are typically seen during the month of May.

During this time of the semester, CARE Team sees:

4. Increase in housing stressors as rent increases
5. There is also an increase in external stressors, such as inflation and gas prices

It is probable that the scenarios above contributed to the increase in CARE cases for the month of May, but it is unlikely they are the only contributing factors.

Below is a graph comparing the number of CARE cases between AY 2021 and AY 2022, both for the month of May and the academic year so far.
